Raw Material

Raw material plays a vital role in the quality of finished products. Sumathi Spinning Mills follows strict quality parameters in cotton purchase. The Managing Director Mr. S. Karthikeyan out of his vast experience picks and procures only the best of cotton. Selection of cotton for the mill is completely monitored and guided by him. The mill purchases only A grade cotton. Sumathi Spinning Mills uses both domestic and imported high quality cotton from West Africa, Benin and domestic varieties of high quality Shankar6 and MCU5. The bales undergo stringent tests before being bought, a systematic mixing plan is maintained by keeping all the quality parameters to produce quality yarn. The procurement of cotton is only done after thorough inspection. Sumathi Spinning Mills has an in-house safe storage facility to store 15,000 bales of cotton.

Manpower

The team, the asset of Sumathi Spinning Mills is made up of experienced people. The mill considers their employees as their most valuable asset. The mill employs more than 200 skilled and 50 unskilled workers. The workforce of the mill hails from all over India. There is a hostel facility for both women and men workers. Free transport services are provided for workers accompanied by security guard for their safety especially during night hours.

The mill is soon going to partner Pradhan Mantri Kaushal Vikas Yojana (PMKVY) which is India's largest skill development certification scheme. In order to provide the right taste of food, the mill has separate canteens for North Indian and South Indian employees, based on the choice of cuisines. Also provided is medical assistance for all the employees.

Infrastructure

Sumathi Spinning Mills has state-of-the-art facilities with advanced machineries meeting international standards. The modern machines help to optimize the production quality besides reducing the downtime.

The machines are installed from the most reputed machinery manufactures like Truetzschler, Rieter, KTTM, LMW, Zinser Saurer and Savio which are chosen based upon their production capabilities and their performance.

Quality

At Sumathi Spinning Mills, Quality Management System is at par with ISO standards. Manual elimination of foreign particles is done with the help of trained labour. Vetol and Nestling i-Scan are used in the Blow-room for removal of colour fibres and other foreign matters from the raw cotton. All autowinding machines are equipped with USTER Quantum-3 Yarn Clearers for removal of contamination found during final winding.

The ability to procure substantially all of its raw materials at the lowest price of the season when quality is at the best, facilitates the company to produce homogeneous, high quality yarn and fabrics throughout the year. The yarns are very carefully selected to be able to live up to the very high demands and take care of the different aspects of quality and special customer specifications.
